¶ A PROGNOSTICATION

for the yere of our Lord god. M. D. L. iiii Declaringe the .iiii. seasons of the yere & the syckenesses of the same, with a dietary in miter, and also the farre cours of the mone Northwarde made by Anthony Askham Physition.

4.

The disposicion from Newyeres day, to the .x. of March, and the syckenesses therof.

Anuary shalbe indifferent warme wether, with softe rayne and more darke and cloudye, then any greate raine with some snow vpō mountaynes and wyndy, and no greate sickenesses that monthe. February windy in the beginning, and aboute the fyrst quarter some snow: but at the last quarter much snow & raine, and distilations, rewmes, poses, goutes, dropsies, shal reygne much this moneth, and specially in olde men, and in some the rewme shal putrifie and make quotidian agewes, in other tertians, but not pure tercians, the begynnynge of Marche, and aboute the

first quarter shalbe sore rayny wether with snowe, and more dysposed to rewmes then before.

¶ Of Spryng tyme and the syckenesses therof.

¶ From the. xi. of march to the. xii. of June shalbe Spryng time, but yet a parte of wynter here in England, as shalbe proued or march be done. Apryll shalbe rayny and colde in the begynnynge and first quarter, and also aboute the full mone & last quarter, & shal bryng in much stoppynge in the brest & longes and coughes, and specially in olde men and women.

¶ Of Sommer and the syckenesses thereof.

¶ From the. xii. of June to the. xiiii of September shalbe Sōmer, in the begynning shalbe many shours with

with hayle, and wyndy, in the laste part of July many shoures & colde & wyndy, August shal be indifferent sauynge the fyrste quarter rayny, & specially the last quarter, and so in lyke maner of August & the begynnynge of September to be rayny, no great syckenesses this seasō but that may come par accidens or certeyne pryuatyse causes.

¶ Of Autumpe and the syckenesses thereof.

¶ Frome the. xiiii. of September to the. xii. of December shal be Autumpe the ful mone and last quarter of Septēber shal be rayny, the end fayre & wyndy wythsome thonder, the beginning of October rayny and the rest indyfferente fayre. Nouēber indyfferent sauing about the newe mone rayny. December in the beginning rany, wyth hayle &

slete, and so about the newe mone & in the ende of Somer & begynnyng of Autumpte, certeyne agewes, as quotidians, quartains, tertians, of citrine coloure shal infect the people in this season, and generally the hed eyes, stomake, brest, & longes, shall suffre much paine this yere, because of rewmes, and catters, & oftymes many distyllacions that shal be lousled from the hed, shal infecte many partes of the body, and specially in olde men and in people that be ful of goute and dropsye, and fleumatyke persons that hath much spyttynge and coughynge at mornes, and to thē that be vnmeasurable eaters, & drynkers without ordre or dewe tyme, wherefore let vs pray to god that he wyl sende vs grace that we may fast for the helth of our soules and bodyes, and that we do not neclecte to haue the counsayle of wyse

Phisicions,

Phisiciōs how to auoide the prima tyfe causes of these aforesayd sycke nesses the whiche be these, vnmeasurably vsed, eating and drynkyng, labour and reste, slepynge and wakyng, and the passions of the mynd, as myrth, ioye, angre, or sorowe, of the which in the measuring of them myne opinion here after foloweth in myter.

¶ Howe to eate and drynke.

EAte and drynke temperately, to your age and complexcion.

Eate and drynke measurablye, as nature requireth.

Eate and drinke ordinatly, at due tyme of refection.

Neither lesse ne more, but as your stomake desyreth.

Folowe the true appetyte, and not what the eye delyteth.

with quantyte and qualyte, and tyme your meate measure.

To purchace bodely healthy, it is the hyghest treasure.

¶ Howe to labour & rest.

¶ Trew moderate labour, maketh parfect disgestion.

It draweth and withholdeth, to the body good norysshement.

It tryethe and it clensethe, by the spirites operation.

It resolueth and auoideth, the superfluytes and excrement

Where is lacke of laboure, and tyme in ydlenesse spent.

There can be no helth, but to god and man preiudice.

Whan al the membres laboreth not, accordynge to theyr office.

¶ Howe to slepe and wake.

Na-

¶ Natural slepe in measure, makes the thyrde disgestion.
without whiche no man can longe indure.
The day to wake, and in the night to haue refection.
Of temporate slepe, the whiche health doth procure.
To much or to lyttel, no health ye may be sure.
Therfore al wise men, ponder this one thynge.
After labour, age and complexion measure your slepynge.

¶ Howe to vse myrth & pastyme.

¶ Use myrth & pastyme, lyue with comforte quyetly.
Eschewe angre and griefe, take mekely tribulacion.
For health of soule and body, it is a speciall remedy.

The angry sadde and sorofull, is alway in partur bation.

They be their owne enemies, that vse such conuersacion.

Dysplesyng both god and man, their owne lyues abrydgynge.

To serue God merely, it is the best lyuynge.

¶ A shorte some and conclution of the aboue sayde.

¶ Eate, drynke, and labour, slepe, rest, and be mery.

In dewe tyme and ordre, measure not excedynge.

In these resteth health, both of soule and body.

If according to gods word, they haue their vsynge.

If these be not kept, Physike profytes nothynge.

whan the sycke is healed, a hath release of payne.

The myſuſe of theſe thinges, bryngeth ſickneſ agayne.

¶ The Eclipſes of the Sonne.

¶ The.xxix.day of June, aboute vii. of the clocke at after noone the ſonne ſhalbe a lyttyll eclipſed, the whiche can not be ſene but in a baſon of water.

¶ The Eclipſes of the Moone.

¶ The.viii.day of December at.ii of the clocke at after mydnight and xvi. mynutes ſhalbe the Eclips of the moone and almoſt all darkened, and ſhall laſt.iii.houres and more, begynnynge aboute mydnight and endynge aboute.iii.houres after.
